

Naschmarkt/Retrofitting Neighborhoods

Moderator: Univ.Prof. DI. Dr. Rosemarie Stangl, university of natural resources and life sciences Vienna, head of the institute of soil-bioengineering and landscape construction

Assistants: Nicole Jalits + Andrea Wieser

24.9.2020

14:30 – 15:00:

- a) Short welcome and short introduction to the workshop (5 min), **Rosi Stangl**
- b) Introductory speech to the topic “Climate resilient cities through Nature based Solutions – European wide goals and local actions. How can EU goals be linked with the local level?” **Holger Robrecht, ICLEI**

15:00 – 15:30:

Presentation of the workshop aim: **Daniela Rizzi, ICLEI**

→ how to efficiently bring fully climate resilient cities in the built environment?

- a) Presentation of the interlinkage between the different levels: from the global to the local
- b) Presentation of the specific topic “Governance”

15:30 – 16:00:

Round of Introduction: Who is participating, what is your interest in the workshop?
How can you contribute to the aims? **Rosi Stangl**

16:00 – 16:30:

Presentation: basic technical background_ Nature based Solutions: **Rosi Stangl**

16:30 – 17:30:

Questions and Answers (from the participants): **Rosi Stangl, Dani Rizzi**

For example:

- a) how do you define a fully climate resilient neighborhood or city? What are the parameters? (technical: microclimate? Rainwater? Energy? Co2? ---economical: Financial instruments----social: health, life quality, re-localisation of economy etc)

b) is it possible to fix the aim of creating a first fully climate resilient neighborhood as agenda for the next 5 years to the Viennese governmental program?

Why would we need that?

c) what are the barriers and obstacles for that aim in general?

25.9.2020

9:00 – 9:30:

Welcome, Questions and answers concerning the presentation of the previous day.

9:30 – 10:00: Governance as the main topic of the 2nd day

Presentations of the different governance levels, with the specific focus on the Naschmarkt neighborhood. With the central question: how can we establish a real life lab for building up a fully climate resilient neighborhood within 5 years as agenda to the next governance program in Vienna?

- a) **10 min** presentation of the local environment and the specific neighborhood Naschmarkt: **Markus Rumelhart**, District mayor of the 6th district Vienna.
- b) **10 min** presentation of Viennese governance Governance/Smart City aims/Climate regulations: **Markus Rumelhart/Peko Bakant**, municipal councillor
- c) **10 min**: presentation of global governance aims: Green Deal, Biodiversity Strategy and the cities **Dani Rizzi**

10:00 – 11:30: Online-Workshop with Mural (Software): Daniela Rizzi

Central Questions:

- a) Stakeholdermapping at the different levels in Vienna (Neighborhoodlevel, City level)
- b) How is the linkage between the stakeholder? How do they communicate? How to incentivize the local people?
- c) Based on a given proposal of an organizational flow-chart: do the identified stakeholders fit into that kind of organigram? What else do we need? What kind of interaction between the stakeholders are needed to fulfill the aims?

11:30 – 12: 00: protocol

Lessons learned. How to proceed further?
